Half million dollars just secured for the Woman's College and endowment fund. Health record remarkable. Accommodations first class. Early application important. Terms moderate. For catalogue and other information write to

JAMES NELSON, LL. D., President.

University of Virginia

CHARLOTTESVILLE, VIRGINIA

The Head of the Public School System of Virginia

EDWIN A. ALDERMAN, LL. D., President

The following departments of Study are represented:

I. The College

In the College, courses are offered in the following culture subjects: Applied Mathematics, Astronomy, Biblical History and Literature, Biology, Chemistry, Economics, Economic Geology, Education, English Language, English Literature, French, General Geology, German, Greek, History, Italian, Latin, Mathematics, Philosophy, Public Speaking, Physics, Sociology and Spanish.

By virtue of the elective system the undergraduate can select any one of a large number of liberal four-year courses leading to the degree of Bachelor of Arts or Bachelor of Science.

II. Department of Graduate Studies.

This department, in which the same fundamental subjects are taught as in the College, offers to Bachelors of Arts and Bachelors of Science the opportunity of specializing in such directions as they may choose and of acquiring the methods of original research. The graduate courses are intended chiefly for those who desire to take the degree of Master of Arts, Master of Science or Doctor of Philosophy but may be taken by any student who wishes a deeper knowledge of any subject than is to be gained from the Collegiate courses.

III. Department of Engineering.

Four-year courses lead to degrees in Civil, Mechanical, Electrical, Mining and Chemical Engineering. Large and well-lighted drafting rooms. Full outfit of field instruments. Thoroughly equipped pattern shop, machine shop, smith shop and foundry. Extensive laboratories for practical work in Physics, Chemistry, Analytical Chemistry and Assaying, Economic Geology, Electrical Engineering and Applied Mechanics. Special Elective Courses will be arranged for students who have completed adequate collegiate courses elsewhere in Mathematics, Physics and Chemistry.

IV. Department of Law.

Beginning with 1909-10 the course of study will be distributed over three years. An excellent special course is provided for students who cannot attend a full course, and who are not candidates for the degree. The library facilities are excellent. Moot and Practice Courts.

V. Department of Medicine.

Organized in 1825, and in continuous operation, except one year, since that date, this department offers thorough medical instruction in the environment of an old and famous University.

The entrance requirements are the completion of a four-year high school course or its equivalent, and of good college courses in Inorganic Chemistry, General Biology, and either Physics, French or German.

The prominent features of the course are extensive laboratory instruction in all the fundamental medical sciences, and abundant clinical training in the practical branches in the Dispensary and in the University Hospital, which contains accommodations for more than one hundred patients, and is the property of the University.

The State of Virginia has provided a Loan Fund, available for needy and deserving Virginia students of talent and character who are pursuing courses in the Academic Departments. The interest from another Loan Fund is available for students in any department. Full particulars on application to the President.

Tuition in the College and Graduate Department is free to all Virginians. All other expenses, including those of board and lodging, have been reduced to a minimum.

Send for catalogue and printed matter.
